

MARYLAND SBR-CERTIFIED SMALL BUSINESS

CASE PROCESSING & BENEFITS SYSTEMS ADVISORY

Provaxis Group brings executive-level judgment to the decisions that determine whether a Maryland technology program succeeds — the business case, the vendor selection, the governance structure. That judgment comes from overseeing delivery of the federal programs that run at the largest scale.

CORE CAPABILITIES

Portfolio & Investment Governance

Built for the moment before money moves.

Business case development • Investment prioritization • Governance and decision frameworks

Independent Program Assessment

Built for the moment leadership needs an honest read.

Program health assessments • Independent verification & validation (IV&V) • Status and risk reporting

Vendor & Procurement Strategy

Built for the moment before a contract is signed.

RFP and SOW shaping • Vendor evaluation • Procurement strategy and oversight design

WHERE THIS APPLIES IN MARYLAND

• **Maryland Department of Labor (MDOL)** — unemployment insurance claims and adjudication: an independent read on modernization investment before it's approved.

Federal parallel: Social Security Administration (SSA) Disability Case Processing System (DCPS)

• **MD THINK** — integrated health and human services case management: program assessment support through the DHS-to-DoIT governance transition.

Federal parallel: Centers for Medicare & Medicaid Services (CMS) Quality Management and Review Systems (QMARS)

• **Maryland Health Benefit Exchange (MHBE)** — eligibility and enrollment: vendor and procurement strategy support for platform vendor selection.

Federal parallel: U.S. Citizenship and Immigration Services (USCIS) myUSCIS citizen-facing benefits portal

• **Maryland Dept. of Veterans and Military Families (MDVMF)** — benefits assistance, memorial programs, veteran health services: portfolio governance for a benefits modernization roadmap.

Federal parallel: Department of Veterans Affairs (VA) benefits and memorial services portfolio; veteran health system modernization

WHY PROVAXIS

BUILT IT, NOT JUST REVIEWED IT

The judgment behind this advisory work comes from having overseen delivery — not from reviewing someone else's after the fact. That track record includes SSA's Disability Case Processing System (DCPS), CMS's Quality Management and Review System (QMARS), and USCIS's myUSCIS.

CROSS-AGENCY BREADTH

The track record spans disability and benefits case management, environmental compliance, and immigration services across six federal agencies — not one narrow specialty. Maryland's own portfolio spans just as wide.

BUILT FOR SCRUTINY

That delivery happened under FDA medical device regulation, Medicare program integrity requirements, and federal privacy and security review. The systems we advise on get audited.

STRAIGHT ANSWERS

Having run independent verification and validation on federal programs, we know what a status report leaves out. Agencies get a candid read on quality, schedule, and risk — early enough to act on it.

RIGHT-SIZED ENGAGEMENTS

Engagements are scoped and fixed-price — a business case, an assessment, a procurement review — so agencies get a defined deliverable and a clear cost from the outset.

MARYLAND-BASED

Provaxis Group is headquartered in Maryland and serves state agencies across the region.

ABOUT THE CEO

Mo Adeyoju
 Founder & CEO

Mo Adeyoju is the Founder and CEO of Provaxis Group. She has spent her career as an executive inside federal technology programs — setting portfolio direction, governing technology investment, building the delivery organizations that execute it, and carrying accountability for the outcome across health, benefits, immigration, and environmental agencies.

Her portfolios have been the federal counterparts of Maryland's own systems: disability claims adjudication, benefits case management, citizen-facing portals, inspection and enforcement platforms, and clinical software regulated as a medical device. These are programs where a failed release is a public event, and where the decisions that matter get made well before the code does.

She founded Provaxis Group to bring that judgment to Maryland agencies as an independent advisor — engaged at the point where the business case, the vendor selection, or the governance structure still determines the outcome.

TRACK RECORD BEHIND THE ADVISORY PRACTICE

The advisory judgment above is drawn from this track record of programs led or overseen by Mo Adeyoju prior to and outside of Provaxis Group.

Portfolio scale: \$300M+ technology portfolios • \$400M+ investment influence • 250+ professionals under direct hiring authority

- **SSA** — Disability Case Processing System (DCPS)
- **CMS** — QMARS beneficiary case review; Medical Review Documentation Compliance & Technology; Website Quality Control (IV&V)
- **FDA** — MARCS — the agency's largest modernization program: field inspection, compliance, and enforcement
- **DHS USCIS** — SPEED — DevSecOps and human-centered design across benefits and customer service
- **EPA** — Clean Air Markets Division (CAMD) emissions monitoring and compliance data systems
- **VA** — Clinical software regulated as an FDA medical device; benefits portfolio IV&V; workflow automation; data discovery and privacy impact assessments
